## SANITARY CIRCUMSTANCES OF THE AREA.

### Water Supply.

The water supply of the district continues to be satisfactory in quality and quantity. There were no shortages during 1966. Two samples were taken for bacteriological examination and were sterile.

Only one occupied house in the district is still dependent on a private well for its water supply. This water was also tested and found to be satisfactory.

There have been no major extensions of public water supplies.

### Sewerage and Sewage Disposal.

No extensions to sewers carried out other than normal minor extensions to meet housing development needs.

A start was made in 1966 on the construction of an additional humus tank at the Sewage Disposal Works.

### Public Cleansing.

House refuse is collected weekly by direct labour and disposed of by controlled tipping. This service is administered by the Engineer & Surveyor.

The Health Department operates the trade refuse collection scheme. A yearly charge of £2.5.0. is made for the weekly collection of one dustbin, or its equivalent, of trade refuse. 252 bins per week are collected from 148 trade premises.

Dustbins for the storage of house refuse are supplied by the Department at an annual hire charge of 6/- per bin. At the end of 1966, 2,521 Council dustbins were in use at 2,367 properties other than Council-owned premises.
